PROCESS MAP

QUALITY APPROACH: OUR COMMITMENTS

The commitments made by the Board of Anywaves and by all the corporate's team are written in our Quality Policy established by the Board of Anywaves.

It is updated thanks to a documented information communicated to both employees and customers via mails and notices boards on Anywaves's sites. The entire policy is reviewed every year during the Management review and as necessary, according to the evolution of the fields of activity and the expectations of the stakeholders.

This Quality Policy includes all quality aspects and provides a framework which allows to establish and review the Quality & Performance objectives. It is fully in line with a logic of continuous improvement.

*"Do not be afraid of perfection, you will never achieve it."
Salvador Dali*

1. **Meet with our clients' satisfaction** – satellites builders and finals clients – **thanks to performant and reliable products delivery; in the frame of contractual engagements**
2. **Develop innovative products** matching with the **satellites constellations market current and future needs**
3. Contribute to the rise of the global space, making ANYWAVES antennas technologies **accessible** and providing a maximum of LEO platforms with them
4. Improve our stakeholders' confidence and make it long-term thanks to an **exemplary disclosure**
5. **Promote the French & European space** by developing the connexions with research laboratories in the aim of allowing breakthrough technologies emergence ; by communicating upon the space benefits towards humanity and by motivating the next generations to be part of such a mission.
